Starting from AutoCAD 2011, many features were made available as browser-based applications including DWG360, 3D CAD Cloud, for online collaboration for free or paid subscriptions. Third-party hosted web-based hosted collaboration and sharing solutions include Collabora Online, Prometica, CollabNet and others. History The AutoCAD system began as two discrete programs: one for 2D drafting, the other for 3D modeling and visualization. In 1993, the 2D drafting program was bundled with a pre-release version of 3D Drafting and visualizing program AutoCAD, and AutoCAD was released to the public with the ability to create 2D and 3D drawings. In the early 2000s, the AutoCAD software became a part of Autodesk's wholly owned subsidiary, Autodesk, Inc. AutoCAD 2008 was the first version that allowed users to create designs and view them on mobile devices. In 2008, the industry was revolutionized with the advent of 3D modeling and design software. Autodesk subsequently created AutoCAD, which is a sister company to the Autodesk architecture software suite. AutoCAD was available for Windows, Mac, and Linux. Initially, AutoCAD was a standalone application that could be purchased from Autodesk. Subsequently, the AutoCAD system was integrated into the AutoCAD Productivity Suite, which provides a set of shared services. With the release of AutoCAD 2009, Autodesk officially announced that Autodesk also owns Inventor, a 3D CAD/CAM program. AutoCAD is also bundled with Autodesk's Grasshopper 3D product, which is designed to do 3D modeling. AutoCAD was subsequently renamed from AutoCAD 10 to AutoCAD 2011. A number of new features were added to the software to improve usability. In AutoCAD 2013, the graphical interface was updated. In 2017, Autodesk redesigned Autodesk Fusion 360, a software platform that bundles various software applications into a single application. This software was

designed to make Autodesk-branded content available on the Web and mobile devices. The software was also designed to be accessed through the web browser. This software includes AutoCAD, Inventor and 3ds Max. In 2018, Autodesk unveiled a new branding campaign, which refers to the AutoCAD software as "AutoCAD". a1d647c40b
