With Microsoft Excel for AutoCAD and other mobile apps, you can do design work with your mobile device. Easy collaboration with the 3D Warehouse: The 3D Warehouse enables you to search for models on Autodesk's cloud-based 3D platform. When you add a model you will be able to access models and related assets directly within your drawings, without having to create a new drawing. AutoCAD can perform searches directly on the 3D Warehouse from within AutoCAD. (video: 1:17 min.) With the 3D Warehouse you can search for and select any 3D model in the world. You can then choose to bring the model into your drawings, or send it directly to the cloud from the 3D Warehouse. (video: 3:10 min.) Including 3D models in your drawings enables you to work in a 3D environment within your drawing. (video: 1:50 min.) AutoCAD can now import CAD files, such as DXF files, from the Web. Importing DXF files allows you to link your drawing to third-party applications such as AutoCAD, like the Web and Excel for AutoCAD, so you can work with these files without having to upload them first. (video: 3:11 min.) Cloud Performance Options: With increased cloud integration, you can decide how much computing resources you need from the cloud, and the cloud can help with balancing your resources. You can change the Performance Options for your cloud account. (video: 1:30 min.)
