I am looking for some gradle task like I want to do some basic precompilation of all templates. A: I needed to add -Dglobal.template.precompile="true" to the play.properties and it does the job. Q: How to insert record in another table when that record is retrieved in another query I am a newbie in sql. I have two tables like this Table 1 employeeID | emp_name ------------ | ----------------- EMP1 | John EMP2 | Albert EMP3 | David Table 2 emp_ID | emp_name | dob | ------------------------------- EMP1 | John | 2010-02-03 EMP2 | Albert | NULL EMP3 | David | NULL I need a query that retrieve the emp_name of Table 2 and insert the emp_name of Table 1 by the emp_ID retrieved in that query. i.e. query 1 select emp_id from table 2 output emp_id | emp_name ---------------------------- EMP1 John insert into table 1 (emp_id, emp_name) values (EMP1, John); I have tried this query, but not getting the result. create or replace FUNCTION replace_emp(p_emp_id1 IN NUMBER) RETURN VARCHAR2 IS emp_name VARCHAR2(100); rec NUMBER; BEGIN rec := DBMS_SQL.OPEN_CURSOR; DBMS_SQL.PARSE(rec,

System Requirements:

Two gamepads are required to play through the main story mode, and one gamepad is required to play the Arcade mode. How to Play: Pit of Hades is a 2D action/puzzle platformer where players control a warrior who must traverse treacherous landscapes, defeat waves of monsters, and seek hidden artifacts in order to save their missing friends and prevent the destruction of the Seven Worlds. Buy Pit of Hades Note: Due to the heavy use of the in-game graphics settings we recommend the following graphics settings for this
