GrandEpiano For PC

GrandEpiano brings you a new era of piano sounds and presets. It's design has been inspired by the vintage sounds and features that we have all fallen in love with. The unique sound engine works in both real and virtual pitch ranges, with a full set of instrument controls that can be easily adjusted to your liking. In an attempt to not limit this plugin, it comes with dynamic visualizations, open control architecture, and a custom automation engine that features in-depth MIDI control of the selected dynamic controls. Why GrandEpiano? If you are passionate about piano sounds, you will know that there are no existing plug-ins that offer the same breadth of control over the instrument's different dynamics, VU meters, and audio snapshots as can be found in GrandEpiano. With the acclaimed CDP piano sound engine at its core, GrandEpiano also comes with 50 modal presets that cover the entire gamut of piano sounds. For the first time on a piano plugin, you can adjust the scale, octave, intensity, and depth of the presets to your liking. GrandEpiano also comes with 50 vintage electric piano presets, which are authentic replicas of the most classic sounds on the instrument, such as the ES-10, ES-85, ES-105, ES-115, and Wurlitzer. In addition, the plugin comes with a variety of other instruments and preset folders that will be mentioned below. The GrandEpiano brand is a product of Eagle-Eye Studios. Our aim is to deliver the most authentic and playable keyboard and synth plugins as possible. Flux is a collection of tools that can turn your head back into the 80s with a little help of modern technologies. The “breaktime” musical era was the sweet spot during which electronic instruments were getting truly popular among musicians. Albeit, there’s a strong bias in favour of symphonic music, the 80s also saw synth-pop and synth-rock at their finest peaks. With a no-compromise sound and a very easy-to-use user interface, the Classic Keyboard range aims to provide a one-of-a-kind set of audio tools to help you create 80s-inspired melodies. The keyboard plugin is capable of capturing the organic and raw sound of the 80s keyboards. Its repertoire consists of 5 different signal chains: “Drums”, “Leads”, “Synthesizers”, “Pianos” and “Melodies”. The “Melodies” section has only one synth with a dedicated filter. Its control allows for a very flexible and customizable pattern oscillator. Even more different is the option to save and load a variety of presets, which are among the best quality presets you’ll find on the market. With a 4-band EQ and an envelope follower, the plugins come equipped with a versatile mix and equalization tools, as well 09e8f5149f
