Keymacro is an expert mouse macro recording tool. KEYmacro records mouse actions one by one, then converts them into mouse macros. You can define many macros using only one or a few button presses. This will save you time and space. Keymacro can record mouse operations on any Windows application, including those that use third-party mouse libraries. This tool is fully multi-platform: it runs on Windows, macOS, Linux, and Chromebooks. The macros can be recorded in the Clipboard, a file on your computer, or uploaded to Keymacro Cloud. When the macros are uploaded, they are converted into the DirectInput keystroke format, which is the default format of the "Keyboard Macro Recorder".
