I have tested many Blu-ray ripping tools and one of my favorites has to be DVDFab Passkey Lite. It is basically a media ripper but with some extra features that help you rip your Blu-rays to the hard drive. For those who are not familiar, rippers typically extract or copy Blu-ray contents into a file and then you can use this file to play on your computer or other devices. DVDFab Passkey Lite is great because it is one of the first and only decrypters to support BD-J as an output format. This is something that I personally always wanted to see in Blu-ray ripping software and I am so happy to see it implemented in DVDFab Passkey Lite. This makes the software a lot more appealing to me. I also want to mention that DVDFab Passkey Lite uses every single feature I wanted to see in a Blu-ray ripping software. The layout of the interface is easy to understand and use
