In the past, designers might have to spend days in front of paper tracing every proposed design change and then wait for the author to review their tracing. Using Markup Assist, designers can rapidly send feedback by one or two clicks, allowing the author to incorporate the proposed changes without having to create a new drawing. If the author accepts the change, the updated drawing is sent back to the designer for approval. For more information on how it works, see [Rapidly send and incorporate feedback into your designs](#).
