Here I want to bind value to xml attribute in my C# code. I have xml file as below, XML file is in following format: 1 dffsdffsd.jpg In my C# code, I need to bind source value from this file. When I am reading this xml file, I did like this: var Story = XElement.Parse(content); I don't know how to bind it. Please help me. Update1: I used XElement.Attribute("source").Value. It does the job. A: Using XElement: var yourElement = XElement.Load(filePath); var story = yourElement.FirstOrDefault(x => x.Attribute("id").Value == "00103"); if(story != null) story.Attribute("source").Value = "dffsdffsd"; Here we are going to first look for the tag element with the specified id and then modify its attribute's value. Q: Can 2 Determinants Equal one another? I have read a proof that, using a matrix method, indicates that  $\det(A+B) = \det(A) + \det(B)$ . Is this correct? I'm referring to the following:

This unique concept was developed by an undergrad student in 2012. Download now and you will receive more than 548,753 downloads over the following three years. Write a review To download Toner Reset Chip for Dell E525W Color Laser All-in-One Printer Refill (BCMY) - \$10.If you want to run the software under a 32-bit operating system, then you will have to search for the Microsoft. Search for the application in Windows marketplaces, download the software from a legal platform and install it normally. Dell 1130 Toner Chip Reset Software After installing the program, run the software by using the key you chose at the start of installation. Select the file you downloaded previously and if you are installing it for the first time, you must tick the box to "Uninstall" programs. Click "Apply" to finish the installation. After the installation is completed, click "OK" on the final dialog box that appears on the screen. What happened to free enterprise? - aorshan ===== jacquesm The free market in general was destroyed by government. It was not a specifically American phenomenon, it started in every country in the world which took the road of central planning. The US, because of having a massive standing army and a reserve army of conscripts with which to support and feed the government in times of peace as well as of war, really was at the forefront of this but it was the countries that had large working populations that led the way here, they simply had no choice. It has taken the rest of the world a very long time to catch up to this. --- aorshan I agree with a lot of what you said and agree that things like the TSA and NSA has broken the trust in government, this is why I wrote the article. The thing I disagree with is your characterizations of how government and the free market work. I read about how the train line workers were all fired and replaced with machines for the best of intentions. The people in this example worked their whole life to build that train line. Now, some city will build a brilliant highway. It's not always about "right" and "
