This is a sample of what I'm trying to do: private function csvPara() { \$file_name = \$this->input->post('csv_filename'); \$this->load->library('excel_reader', \$file_name); \$input = \$this->input->post('input_data'); echo \$this->excel_reader->read(\$input); } This is the function so far. Now I want to put some string into my button. How can I do that? A: here is an example, how you can add extra text: now you add this function, to get the text: \$(document).ready(function() { \$("#button_id").click(function() { var btnText = this.value; alert(btnText); }); }); Q: Adding elements to a list Python A few days ago I stumbled upon this question: Python: Add element to a list I created a new question since I tried to implement it but it doesn't seem to work: import random def test(list): list.append(range(0,9)) def main(): test([]) return if __name__ == "__main__": main() The method test() is meant to add a list as defined in the question to a list. Elden Ring For Windows

□ Story ♥ ● Love In Secret ● Shadows of Oblivion ● □ In an era when the Elden race lived as a fledgling breed protected by the Archmagister of the Elven Kind, after the Archmagister vanishes and the land becomes a scar of chaos, it's up to his granddaughter to defend the Elden race against the invasions of the supernatural. □ Characters ♥ □ Princess Ardyn: A princess of an Elden race that was now a child, she lived in a small secluded island in the distant Northern Lands with her grandmother. Her grandma's wish was for Ardyn to keep the secret that the Archmagister of the Elven Kind had disappeared, even though she knew the dangers of darkness and magic. Ardyn decided to live on by herself and in her efforts to protect the Elden race, she has begun her rise to the top. Crom: A powerful wizard who returns to life in the Elden Kind after being murdered in the chaotic world, he was reborn as a hybrid of a human and an Elden, and began to live in a village in the unnamed lands. After being cured of his depression that caused him to lose his humanity, Crom's power as a wizard was confirmed and he became a member of the Archmagister's staff and a magician for the Archmagister's grandson. Hircine: A young man who has become a spy to fight evil beings. He was a resident of a human world who was transported to the Elden world by a prophecy to recover an item in an otherworld in order to save a girl. The Archmagister's granddaughter of the Elden Kind was the only person he could tell about his identity as an Elden. Elsa: An ice spirit who comes to the unnamed lands to aid Princess Ardyn. She was the spirit of a princess who fell in love with a human, and, in order to be able to return to the human world, stayed in the unnamed lands with the dragons and became their ally. She hated the darkness that threatens the Elden race, and was a supporter of Ardyn's efforts to protect them. ● Ardyn's Storyline ● Feared for its magic and threat of darkness, the Elden race fought against the invaders of the supernatural with magic. Princess Ardyn

**iTunes Wired World Tour Trailer Fri, 22 May 2018 19:49:35 GMT
Hard Wired World Tour trailer. (geForce GTX1060 6GB/)/3.97 (xFire Users) on my PC. I recommend the 660ti version. There is no MP damage, or people pushing through obstacles, this is the hardwired version. Then the game is so much more joyous. Thanks for the comments. It amazes me how good a game looks on Xfire.**

Also, a little on update status, as I decided to give a price cut on \$50 from \$70. I will continue to promote the game. It's old, imo and imo, still stand as a example of a JRPG I want to visit

As of now, it is the only FF game I have tried to play and I can honestly say, that I fell in love with it, even with its flaws. I could hear the weather change when Johnny comes running in from a walk. The music was great. The music brought it to life. It really makes me feel part of the world

you're creating.

Q: SWT Browser tests with SWTBot I'm using SWTBot to test the browser integration of my WebDialog component. It works fine in Eclipse SWT Bot with a very basic integration test, but fails miserably when I try to test the Firefox and Chrome browsers. Here is a failed test run from Firefox 12/Ubuntu 11.04 using the 'Add-ons' dialog. Note that the Add-ons Manager is executed in a WebDialog, but you can imagine that it
