Based on the popular 3D Game The Legend of Heroes: Trails of Cold Steel II, which was released in Japan on December 1st, 2013. Trying to improve what made Trails of Cold Steel II so great, the user interface and visual, while keeping in mind the 3D visuals that have been made possible in OS X, Windows and Linux.

Description of Lands Between: In the Lands Between, a group of people gave their lives to forge the Hometown of the Gallian Empire. However, they did so for the sake of mere pride, and their fallen legacy has led to a dull, desolate city. The noblemen of the Hometown have been universally displaced, and the only one who remains is a woman known only as "the Witch of Chaldea". Unrequited love has left her heart bitter and alone, and her desire to cut away the heads of the nobility back in Gallia is the only thing that keeps her going.

As the heiress to the Black Heaven Spell Crest, the Witch of Chaldea will soon be able to wield the power of the Lunar Magic. To do that, she must forge a fragment of the Eternal Insignia, a powerful spell that was used by all the noblemen of the 1st Eroica War. If the Amaterasu Empire, the great adversary of the Lands Between, is going to bring civilization and magick to the Lands Between, she and the other warriors in the army of the Black Heaven Scouts must defeat it. They must also understand the destiny that awaits them.
