Take control of a cute Mechanical Animal Companion Unit, often referred to as "Makus" or more commonly, "Orbos", because of their spherical shape. Play as one of 7 Orbos as they vie for dominance in up to 2 different arena style maps in one of 2 game modes. Once built by technodruids for assisting research and harvesting a newly discovered crystal energy source, the forgotten robots now run amok in abandoned mines and outposts where resources are now dry. Fast and frenetic, it's a fight to the finish to be the top bot. Ice Station Z - Tiger Skin Pack PC/Windows [Latest-2022]

The Wraithlord is now armed with a feared Doomblade, which he wields more viciously than ever. Smash!Smash! Can you collect all the shards that rise from the ground, or can the Doomblade fall and feast on your soul? A new ultimate skill has been added to the arsenal of each playable character, called "Soul Shredder". The Doomblade gives the Wraithlord temporary invincibility. When activated, the Wraithlord becomes immune to damage for 2 seconds. He can only be destroyed while the Doomblade is active, but the Doomblade cannot be recovered if a player smashes the Wraithlord before it expires. All powerups, including the powerupable Ultimate ability, can be activated for free while the Doomblade is active! All enemy players are slowed and left vulnerable. Hold the Doomblade in the air, and they will be stunned for 2 seconds. Keep it close and the enemy will be pushed into the air, and they may even fling themselves downwards. The Doomblade can be stored by picking it up, which makes it safe to use as long as the Doomblade is being held. It can be flung to any other nearby player, so that they may use the Doomblade for themselves! This skill works with all other Ultimate abilities. Extra particles have been added to the Doomblade's animation. The Doomblade cannot be picked up while the Wraithlord is being thrown, but its particle effect is reflected by the projectile. System Requirements:* Windows 98/ME/2000/XP/Vista/7 So far about the "Points" i have made: 100% stat points help every character so they can do better in game. Character level is like the status on the public server. The shield (the yellow thing the character has in their carapace) is the point you get when you reach certain milestones in the game. So far the latest milestone is the level 25 milestone. The shield gives a bonus to the base stats and even gives you the ability to equip a special powerup that is equipped only if you have the shield. Example: i have 3 points in my shield at level 25, and i have the big mushroom at level 25, so i can equip it, but i cant equip the knife, the pistol or the laser. You will get the shield when your level hits level 25. Like i said
