Manhã, 14 de Junho de 2010 Traz 1,4 milhões de km de motorista Â© - UOL â€”  
8,30/Folha online O papel de garagem do tráfego amazônico é o mais restrito dos quatro continentes. Além da maior parcela de terras, a Amazônia é uma das maiores áreas de energia solar e luz e também é única na quantidade de água que chega aos rios do litoral. Assim, em 2009, a água azul da Amazônia foi responsável por 23,6% da produção total do Brasil de água potável e em 2009, por 28% da produção de eletricidade. Óleo diesel e gasolina, demasiado escasso na região, ainda não alcança as regiões centrais. Além de ser considerado um dos últimos limites da Amazônia - espaço para células motrizes sobre água, ninhos e árvores, e área para que os animais se aglomerem quando chega ao mar do Amazonas ou ParaÃ§os -, é apresentado pelos pais da Amazônia como o "foco" de muitos sequestros ilegais. A partir de 2016, talvez pela primeira vez, uma estratégia seja enviada ao Governo Federal e ao Governo do Amazonas para uma intervenção ecológica mais eficaz para o órgão mais importante da floresta brasileira. Apesar de ser especialista na economia, ao longo de sua vida profissional, Mauro Bivar escolheu o trabalho na área ambiental e procurou manter no seu radar um tema não aberto e desconhecido por todos. Pela primeira vez em 0cc13bf012
