Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming

language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Although Roblox has received generally positive reviews from critics, it has faced criticism for its moderation, microtransactions, and exploitative practices directed toward children.

Wonderful site with great content and great games, I had no idea that there are tons of free robux waiting for me in this site. When Rajdeep Sardesai puts down his phone for a few minutes, it's like a vacation from the TV circus. After watching the prime minister on TV in the morning, reading about him on his blog, following him on Twitter and on Facebook, where he has nearly 400,000 followers, Rajdeep would normally grab a

beer, put his phones away and relax for a while. That's how he rolls. But this is no ordinary summer. The World Cup is on, and Rajdeep's job is to cover it from now till the end of the tournament. He has his music on, but the background is clear. He isn't on Twitter. He isn't watching TV. He is strictly Rajdeep. From Wednesday, Rajdeep will live on the Internet. It's a whole different ballgame. As India sends its team out to the Middle East to face Pakistan in its final two games, Rajdeep will report all the stories that interest him: How the IPL matches have changed the way Indians play cricket. How the World Cup will be different from the past World Cups and how Indian captains will perform. How the BCCI has botched the IPL auctions. How the Kolkata pitch looked like it would turn bad on the fifth day. How India will use its lower-order batsmen - Yuvraj Singh, Virender Sehwag and Rohit Sharma. How the spectre of 2006 hangs over the

India's innings, and how they'll have to get the top three batsmen in the game. How the upcoming South Africa series will be a test of Sachin Tendulkar's retirement. How to tweak the team without hindering young Indian players. And how the final will be played, all the way. Rajdeep's Network The set of TV channels that Rajdeep Sardesai watches are the big ones. They won't change, even in the absence of an advertisement. There will be no more of his freeloading in the content he gets from Star Asia. There will be no more of the free publicity from India Today Group. The only money that he will accept from the Star Group will be from his blog, his Facebook and his Twitter.
